

VM-MFKEQ Master Firefighter Telephone Seismic Kit Installation Sheet

Description

Installing the VM-MFKEQ seismic kit keeps the master firefighter telephone of a VM-1 fire command center in place should a seismic event (earthquake) occur. The fire command center is comprised of a VM-PMI Paging Microphone Interface and VM-MFK Master Firefighter Telephone Kit.

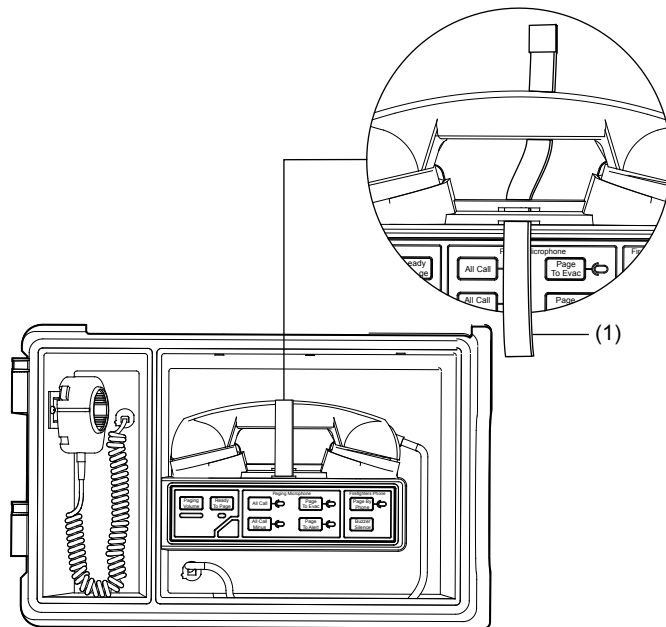

The VM-MFKEQ kit provides one Velcro self-grip strap.

Installation

To install the VM-MFKEQ:

1. Thread the Velcro self-grip strap through the slots on the telephone cradle and then secure it by overlapping the Velcro strap ends.
See Figure 1.
