DCNM-FCMMD Transport case for 6x DCNM-MMD

www.boschsecurity.com

BOSCH
Invented for life

- Proven construction
- Equipment-shaped foam interior
- Easy to pack, unpack and transport equipment
- Roller wheels for convenient transportation
- Cushion grip handles; trigger release latches

The transport case is used for storing and transporting DICENTIS equipment.
It has compartments for 6 multimedia devices, 6 high-directive microphones, 6 microphones with short or long stems, and a compartment for cables.
The transport case is manufactured from proven material to ensure for adequate protection of DICENTIS equipment during transportation and storage. The shaped foam interior ensures for fast and convenient packing and unpacking of equipment. The transport case has wheels and a retractable handle for convenient ground transportation and to prevent unnecessary lifting. The handles and latches are recessed and protected.
